

Ghaf Business Intelligence
BUSINESS INTELLIGENCE FOR CLAIMS
OPERATIONS

Claims, reports, and XML workflow intelligence in one glassy workspace.

Ghaf Business Intelligence centralizes portal syncs, claim summary reporting, XML parsing, remittance matching, and admin oversight for healthcare revenue-cycle teams.

Live capture

The operational view your team opens first.

The dashboard gives admins a fast read on facility health, downloaded files, record volumes, and the latest sync timestamps. This is the control surface for the app's daily work.

Synched Transactions

DOWNLOAD, RESUME, AND FILTER WORKFLOW

The portal workbench for downloaded records.

This view shows pending downloads, interrupted syncs, background download service state, and a searchable transaction grid. It is the operational hub for portal data triage.

Synched transactions

67,523 total

47,159 downloaded

20,364 pending

Download interrupted
Disconnected - 248 failed · last record #12226 · at 9:59:49 AM

Background Download Service
Idle - not yet run this session

Quick actions
Download pending files, run sync, resume, discard

Filters
Portal, Facility, Date range, Search, 1M/3M/6M/1Y/2Y shortcuts

Column set
Transaction ID, Portal, Facility, Type, Status, Payer, Amount, TX Date, File, Synced

This is where the team verifies file download completeness and filters records before downstream matching and report generation.

Reports & XML Parsing

CLAIM SUMMARIES AND RECORD MATCHING

The workflow layer that turns raw files into usable claims insight.

Report scheduling and XML parsing work together so the team can choose a date range, generate a report, then validate the inbound and outbound records that feed it.

Claim summary report

SCHEDULER PREVIEW

Date ranges

Today, This Month, Last Month, This Year, Last Year, Custom

Search criteria

Encounter start date default, facility, receiver, payer, clinician, department

Actions

Submit, Reset, Clear, Download, Delete

XML parsing workbench

MATCH & PROGRESS

Totals

Sub files, RA files, RA rows, matched refs, open sub refs, unmatched RA refs

Operations

Prepare, Rebuild, Match, Add, Edit, Delete, Save

Output

Ready records for faster report generation and cleaner reconciliation

What the brochure captures

BRAND + WORKFLOW

Visual system

Glassy cards, deep navy / teal palette, rounded controls, and soft gradients.

Operational focus

Claims, remittance, background sync, and report scheduling in one place.

Mobile support

Responsive nav, stacked cards, and scroll-safe tables for smaller screens.

Audience

Admins, analysts, finance teams, and facility operators.

If you want the next iteration, I can turn this into a branded one-pager or a sharper multi-page PDF with actual capture exports once the browser screenshot pipeline is stable again.
